An Archaeology Of Colonial Identity

This book examines how colonial identities were constructed in the Cape Colony of South Africa since its establishment in the 17 th century up to the 20 th century. It is an explicitly archaeological approach but which also draws more widely on documentary material to examine how different people in the colony - from settler to slave - constructed identities through material culture.

Spanning the globe with case studies from East Asia, Siberia, Australia, North and South America, Europe, and Africa, sixteen contributions written by archaeologists, art historians, and historians from four continents offer unusual breadth and depth in the assessment of various facets of claims to patrimonial heritage in the context of imperial and colonial ventures of the last two centuries, and their post-colonial legacy.

Unmasking Ideology in Imperial and Colonial Archaeology ...

Historical archaeology is the concurrent study of material culture and documentary evidence. The practice of historical archaeology is rooted in the study of the European settlement of North America and, in particular, of the early seventeenth century colonial settlement in New England and the Chesapeake.
