## **Learn How to Document Processes**

A data-flow diagram is a way of representing a flow of data through a process or a system (usually an information system). The DFD also provides information about the outputs and inputs of each entity and the process itself. A data-flow diagram has no control flow, there are no decision rules and no loops.

## **Data-flow diagram - Wikipedia**

• System flow chart • Data flow chart • Document flow chart • Program flow chart. Data Flow Diagram. A data flow diagram is a representation of data flow through a system during which it is processed as well. The flow of data from an external source or internal source to its destination is shown by a diagram.
