Freshwater Crayfish Aquaculture in North America, Europe ...

Virtually all crawfish culture also relies on natural reproduction rather than stocking hatchery-reared juveniles. The predominant cultured species in North America, the red swamp (Procambarus clarkii) and white river crawfish (P. zonangulus), are classified as “temperate” species; that is, they will tolerate cold winter conditions. Both species, however, possess a number of traits that are usually associated with animals that live in warm waters.

Bacterial Diseases of Freshwater Crayfish - Geocities.ws

Freshwater crayfish occur naturally throughout Australia. Three species, yabby (*Cherax destructor*), redclaw (*Cherax quadricarinatus*) and marron (*Cherax tenuimanus*) are exploited commercially. Commercial marron production is largely based in its natural habitat in south-west Western Australia (WA) and there is an expanding base of production in South Australia (SA) especially on Kangaroo Island.
