## **Drafting: Orthographic and Isometric Drawings**

Isometric Drawings A pictorial drawing shows the height, width, and depth of an object in a single view. The most common type of pictorial drawing used in the drafting industry is the isometric drawing. An isometric drawing is a view in which all three axes appear at equal  $120^\circ$  angles with the plane of projection. See Figure 3A-1. This supplement

The isometric is one class of orthographic projections. (In making an orthographic projection, any point in the object is mapped onto the drawing by dropping a perpendicular from that point to the plane of the drawing.) An isometric projection results if the plane is oriented so that it makes equal angles (hence "isometric," or "equal measure") with the three principal planes of the ...
