Limnology - 3rd Edition

Limnology, is the study of inland aquatic ecosystems. The study of limnology includes aspects of the biological, chemical, physical, and geological characteristics and functions of inland waters. This includes the study of lakes, reservoirs, ponds, rivers, springs, streams, wetlands, and groundwater. A more recent sub-discipline of limnology, termed landscape limnology, studies, manages, and seeks to conserve these ecosystems using a landscape perspective, by explicitly examining connections bet

Limnology: Lake and River Ecosystems by R.G. Wetzel ...

Limnology is the study of surface waters that are located inland. Inland surface waters include lakes, ponds, springs, creeks, streams, rivers, estuaries and wetlands. Limnology encompasses both fresh and salty water bodies. Limnology, however, does not include groundwater for obvious reasons; groundwater is not on the surface!
