Bootastik's free Kindle books have links to where you can download them, like on Amazon, iTunes, Barnes & Noble, etc., as well as a full description of the book.

Rock Cycle Fill In The

The Rock Cycle. There are three main types of rocks: sedimentary, igneous, and metamorphic. Each of these rocks are formed by physical changes—such as melting, cooling, eroding, compacting, or deforming—that are part of the rock cycle. Sedimentary rocks are formed from pieces of other existing rock or organic material.

The Rock Cycle | National Geographic Society

A diagram of the Rock Cycle with blank spaces for the students to fill in. An example of what they should write is included. The diagram includes sedimentary, metamorphic and igneous rock. There are lines for students to add vocabulary words that explain the way rock changes between each rock type. It was created for students to see that rocks can change in a cyclical pattern and also includes lines to show that rocks change back and forth.

ROCK CYCLE QUIZ - Science Practice Quizzes | Science Help

The rock cycle is the entire process of forming rocks, and like a circle, it has no beginning or end. In this rock cycle project, we simulated the formation of sedimentary rocks by pressing the pieces of Starburst into a lump. We simulated the formation of metamorphic rocks by adding heat and pressure in steps 4 and 5.
