Historically the 550F is known as VERY solid, just a gas hog. In fact, before this year I can't remember a single post about 550's failing. There may be a problem with the new chassis and how they are setting up the 550F, but I think RF based machines have always been pretty stable.

The 2007 Ski-Doo Freestyle 550 Park handled so-so. The skis looked similar to those on the SuperSport, but seemed to perform better on the Park. The ski stance was widened this year to 39 inches, but it still felt tippy, especially in rough corners. The front suspension was only OK.
