Circular motion requires centripetal force. 2. The larger the centripetal force, the faster an object travels in a circle of a given size. 3. At a given speed, the larger the centripetal force, the smaller the circle. In an Olympic event called the "hammer throw," an athlete twirls a massive ball on the end of a wire. once he gets the ball twirling very quickly, the athlete releases the wire, allowing the ball to fly straight out into the field.
